

 new **Nimbus Meridian**

The missing link in our Nimbus lineup! The Meridian is a top loader with a floating lid /fanny pack and a single vertical zipper front access panel. It was specifically designed to withstand the rigors of the 10,000 miles of hiking our extreme pack tester Jason Lichtner plans to do this year. "Trauma", as he is known as on the trail, started November 3rd and by Christmas had already hiked well over 1000 miles. We utilized the newly released RiRi water resistant tooth zippers for the fanny pack lid and the front access panel because they offer superior durability and water resistance to any other zipper we have seen. Reflective material on the daisy chains and on the shoulder straps insure Trauma will be seen when road hiking at night, they will also make it easier to locate the pack in the dark. For slack packing strip off the lid and use it as a fanny pack. Built with the same frame and harness as our award winning Nimbus Ozone the Meridian pack offers the rare combination of durability, convenience, versatility, and comfort in an ultralight trail pack.

1986-2006

Welcome to our 20th anniversary dealer workbook. Back in 1986 when Granite Gear was formed, our industry was quite different than it is now. Many of the changes have been for the best, but some things, in our opinion, were better back then. Take for example the grassroots nature of our industry. Here at Granite Gear we've stepped back and asked ourselves, "How can we spread a little more of that grassroots flavor we've kept since our beginning?"

The answers are not always easy, but you'll find that doing business with us is just a little friendlier, a little more environmental and a lot more fun.

Grassroots Guarantee

We don't rely on fancy ads or glossy catalogs to build our reputation. We rely on satisfied customers to spread the word. So, we invest in R&D and better fabrics and construction, and we stand behind what we do. If you're not satisfied with one of our products for any reason, even after years of use, return it to us. If there's a problem with the materials or craftsmanship we'll repair or replace it. If it's normal wear, we'll repair it for a reasonable charge. Spread the word!

Dan & Jeff in 1986

What's New

Nimbus Meridian

See Cover

Northern Light

You've heard of 4 season tents how about a 4 season tarp system? The Northern Light is built like our White Lightnin' tarps with catenary cut edges, tension tape around the perimeter and down the center seam. Plus it has adjustable cinching corner straps to keep the whole thing taut. The addition of a snow-flap running the length of both sides lets you seal the sides from blowing snow in the winter or bugs in the summer. Add the optional Tarp Dodgers to both ends and you've got a fully enclosed 4 season system. Comes complete with micro cordage guy lines and it's own attached stuff sack.

8' x 8' • 1 lbs 5 oz • 0.59 kg • \$135

Tarp Dodger

Effectively seal one or both ends of nearly any 8' tarp set up A-frame style. This system attaches to the peak, the corner and center stake loops, then stakes out like a vestibule to seal the ends of a tarp and add additional gear storage. Buy one to seal a single end to protect from horizontal rain in the summer or two to seal both ends for winter use.

6.7 oz • 0.19 kg • \$55

Dreamsack

Do you want the comfort of a real pillow without the weight? The Dreamsack is an Ultralight Sil-nylon stuffsack with luxurious fleece on one side that is shaped like, well, like a pillow. Stuff it with something soft like a fleece or down jacket and snuggle in. Sleep well!

360 cubes • 2 oz • 6 liters • 57 gm • \$16

Immersion Portage Pack

We set our sights high when we decided to develop a welded waterproof portage pack. The goal; a fully waterproof pack that offered the comfort and durability people have come to love in our Expedition Series Portage Packs. To achieve this we knew the shoulder straps, belt and back needed to match what we use in the Expedition Series and the material had to have equal abrasion and puncture resistance. Welded vinyl packs just don't have a reputation of holding up to use in the rugged, rocky BWCA or Quetico. One small puncture can cause them to literally suck water into the pack and they get abraded quickly and easily! We chose a 500 Denier fabric with a Beefy TPU laminate to be waterproof, durable and weld-able. We used the exact same sewn and stuffed shoulder straps and belt from the Expedition Series and developed an innovative way to attach them to a fully welded pack without compromising how waterproof the pack is or hurting the comfort in any way. A full roll closure is easy to load and tight as can be. So, if you're the type that has a habit of finding yourself in the water holding on to your canoe and your gear while floating down the rapids, or you just like to paddle in the rain and you want your pack to be able to sit in bilge water all day this pack is our answer to your dreams. Enjoy it, but don't drown yourself!

5250 Cubes • 86 Liters
Dimensions 18 x 24 x 10"
Regular Torso Only: 18" - 22"
4 lbs 3 oz • 1.90 kg • Royal Blue • \$260

Hacky Stash

Stuff it, kick it, pack it along, stop and kick it some more. It's more than a hacky sack, it's also a handy pocket. Fill it with a bandanna, a sock or some para-cord for a cloths-line or an ultralight bear-rope setup. Put a rock in the sack to toss it over a limb and then it's a great tool. Fill it with coffee beans or lentils for real hacky performance. Bottom line: have fun with it!
